DETAILED ACTION

Claims 1, 2, 3 and 18 are currently pending in the instant application, appear allowable over the prior art of record and have been renumbered as claims 1-4. The acceptance of the English language translation of the international application has overcome the objection to the specification and the 35 USC 112 1st paragraph rejection of the claims.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 13 April 2007 has been entered.

Drawings

The drawing(s) filed on 8/10/2006 is/are accepted by the Examiner.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard Gallagher on 18 June 2007.

The application has been amended as follows:

Art Unit: 1626

1. Amend the abstract by replacing it with the following paragraph:

"A reaction mixture obtained by reacting a substrate in the presence of an imide compound having an imide unit represented by the formula (1) can be efficiently separated through crystallization and/or extraction with a specific solvent into the imide compound and a reaction product. (In the formula, X represents oxygen, hydroxyl, or acyloxy.) Furthermore, a mixture comprising the imide compound and a metal catalyst can be efficiently separated through crystallization, adsorption, and/or extraction into the imide compound and the metal catalyst."

Reasons for Allowance

The following is an examiner's statement of reasons for allowance. This invention relates to a process for separating a reaction product and an imide compound having an imide unit represented by formula (1) which process comprises separating said reaction product and said imide compound from said reaction mixture by solvent-crystallizing the imide compound from said reaction mixture with water or a mixture of water and at least one solvent selected from the group consisting of a hydrocarbon and a chain ether, or when the reaction mixture is obtained by an oxidation reaction of a monocyclic C₄-16cycloalkane substrate, with at least one solvent selected from the group consisting of a hydrocarbon and a chain ether. The closest prior art of record, US 5,030,739, which discloses the process of oxidizing an isoprenoid having at least one allylic hydrogen atom, such as terpenes, sesquiterpenes and steroids, such as a-

pinene in an inert ketone or ester in the presence of NHPI, fails to teach or suggest applicants instantly claimed process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
